

ABOUT EDMOND SCIENTIFIC

Understanding. Achievement. Education. In order to identify problems and make informed decisions, people need accurate information in a timely fashion, with the ability to easily manipulate and process that information. Once decisions are reached, implementing plans and achieving technical goals is only possible through the creative application of design, analysis, engineering, and testing. Finally, once solutions are implemented, education takes contemporary results and translates them into the basis for realizing tomorrow's achievements.

Founded in 1997, Edmond Scientific was formed to provide support to customers in these three interrelated areas. We strive to comprehend the entire problem to create solutions that lead to deeper understanding, higher achievement, and improved education. To provide information solutions that process, resolve, and present complex data in manageable, useful formats. To provide engineering support and create technical solutions that endow customers with the tools they need to achieve results. And finally to train and educate tomorrow's professional and technical workforce with today's technology.

Information systems. Systems Engineering. Training and Simulation. Edmond Scientific takes today's challenges and creates tomorrow's foundation. At Edmond Scientific, "We engineer solutions."

We welcome your collaboration and partnership.

John E.R. Pitale
President
EDMOND SCIENTIFIC

INFORMATION MANAGEMENT

DATA MANAGEMENT SOLUTIONS

A complete enterprise solution means knowing your information can be shared and safeguarded. Successfully implementing solutions requires the right combination of people, processes, and systems for planning, design, implementation, and operations. Edmond Scientific applies our knowledge to help customers share information and provide better service. Specific capabilities include:

- Application Development and Integration
- Data Migration and Integration
- Records Management
- Web Retrieval and Publishing
- Knowledge Management and Workflow
- Change/Revision Management
- Systems Operation and Maintenance

DOCUMENT IMAGING SOLUTIONS

The basis for all e-business is the paperless office. That is why the conversion of paper and electronic documents to digitized data files is the first step in moving towards the paperless office. Edmond Scientific's media center is able to convert and quality check more than 2 million pages per year, offering a complete array of document conversion products and services, to include:

- Scanning and Imaging
- Tagging (SGML, XML, HTML)
- Indexing
- Data Capture and Database Population
- ANSI/ASQC and ISO 9001 Quality Control
